

QO MANUAL TRANSFER EQUIPMENT KITS

Features and Benefits

- Three QO Manual Transfer Equipment Kits are available to work with QO single-phase convertible main load centers to secure two 2-pole, 10 to 125 ampere QO circuit breakers to allow use of back-up power supply applications
- UL Listed Accessory Kit
- Provides economical means for connecting back-up power on convertible main load centers
- Provides maximum flexibility in choosing energized circuits — gives the homeowner complete flexibility to choose which circuits to energize during a power outage and easily switch back-and-forth depending on homeowner needs.
- Includes Mechanical Interlock to prevent both main breakers being in the “ON” position at the same time
- Ideal for residential and commercial use
- Panels can include up to 42 circuits
- UL Listed Accessory Kit

PK4DTIM4HA

Greater Flexibility to Create Back-Up Power Panels

Ideal for use in both residential and commercial applications, these kits offer greater flexibility for building a back-up power panel up to 125A service, with a maximum of 42 circuit spaces.

When it comes to circuit breakers, load centers and back-up generator solutions... no one does more with electricity than Square D Company.

Load Center Mains Rating	Catalog Number	Product Code	Mounting & Load Center Type Information	Retaining Information	Package Quantity	Discount Schedule	List Price
QO Manual Transfer Equipment Kits							
QO 100–125A Maximum	PK4DTIM4LA	40027	Mounts on right side of QO single-phase 100–125 ampere convertible main load center Series S01 and S02	Retains two 2-pole QO breakers with a QO2DTI Kit included for dual power supply applications	10	DE3A	\$65.00
QO 150–225A Maximum	PK4DTIM4HA	30716	Mounts on right side of QO single-phase 150–225 ampere convertible main load center Series S01 and S02	Retains two 2-pole QO breakers with a QO2DTI Kit included for dual power supply applications	10	DE3A	\$65.00
QO 100–125A Maximum	PK4DTIM4LAL	30721	Mounts on LEFT side of QO single-phase 100–125 ampere convertible main load center Series S01 and S02	Retains two 2-pole QO breakers with a QO2DTI Kit included for dual power supply applications	10	DE3A	\$65.00
